Delicious, Fun, and Healthy

森永製菓株式会社

Morinaga & Co., Ltd.

The Morinaga Group will continue to create healthy foods that can be enjoyed beyond generations, thereby bringing smiles to the faces of people around the world now and in the future.

Morinaga & Co. Ltd. was established in 1899 as a confectionery manufacturing company. In the 120 years since its founding, the company has tackled many challenges.

The first challenge tackled by the company's founder Taichiro Morinaga was to provide delicious and highly nutritious Western confectionery to the people of Japan, who in the late 1800s lacked nutritional food options and were unfamiliar with Western confectionery culture. Ever since then, we have continued to tackle numerous challenges, such as the development of milk caramel packaged in pocket-size boxes and the first chocolate in Japan to be produced from cacao beans in a "bean-to-bar" process. Such efforts have enabled us to provide a diverse range of memorable products that are cherished by Japanese consumers. The trust that we have earned from our customers and the public through these efforts is one of the core strengths of the Morinaga Group.

In fiscal 2021, we began to implement our 2030 Business Plan, a new long-term management plan formulated with a long-term view toward further growth and enhancement of our corporate value that will enable us to realize our 2030 vision. Amid the turbulent changes in the current external environment, we will address those changes by leveraging the technologies we've accumulated and the trust we've earned over our 120-year history. Our efforts will be guided by a sustainable management approach to solving important management issues that integrates both financial and non-financial considerations as we work toward our **2030 Vision "The Morinaga Group will Change into a Wellness Company in 2030. Further evolve reliability and technology built on in its 120-year history to support people's wellness life styles in all generations worldwide."**

In the 2021 Medium-Term Business Plan, the first stage of the 2030 Business Plan, we made steady progress in our initiatives to build our management foundations, in addition to realizing high growth. However, issues remain from the perspective of profitability. In light of those issues, in the 2024 Medium-Term Business Plan, we will aim to establish a "growth trajectory" based on a virtuous circle of growth potential and capital profitability by practicing ROIC management. In doing so, we will bring certainty to our path toward the achievement of the 2030 Business Plan. We will also pursue greater diversity and inclusion, which we have declared as a key basic policy for the realization of our 2030 vision. Based on the principle of "Leverage each person's individuality," by enhancing our ability to respond to changes and creating innovation through augmenting the diverse knowledge generated by various individuals, we together with our customers will continue to address those customers' and society's challenges.

To be a sustainable company that continues to grow, our mission is to ensure that the Morinaga Group continues to create healthy food products that are cherished by people of all ages and continues to conduct all of its corporate activities in a manner that helps bring smiles to the faces of people around the world today, tomorrow, and into the future. By creating food products that promote the health of both minds and bodies, we will contribute to the realization of a happier and more sustainable society.

The MORINAGA Group looks forward to your continued support and guidance.

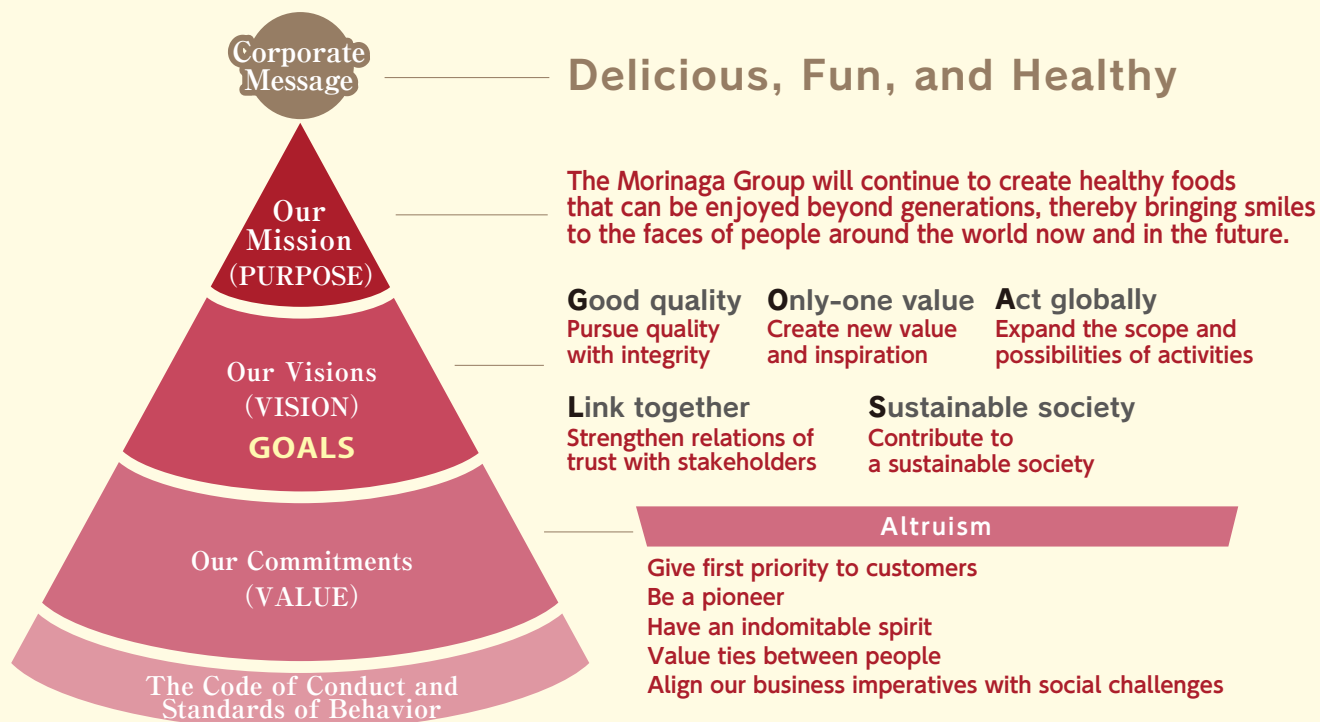

Representative Director, President, COO

Shinya Mori

The Morinaga Group's Corporate Philosophy

Corporate message 「Delicious, Fun, and Healthy」

The Morinaga Group's Corporate Philosophy is composed of Our Mission, Our Visions, and Our Commitments. Our Mission states how the Group will contribute to society, and Our Visions comprise the five visions that we will pursue toward the future. Our Commitments represent the values that we have developed during more than 100-year history since the founding of the Group and will continue to uphold as our firm belief for many more years to come. To describe the essence of our Corporate Philosophy in one word, it is "Delicious, Fun, and Healthy."

Our Mission (PURPOSE)

The Morinaga Group will continue to create healthy foods that can be enjoyed beyond generations, thereby bringing smiles to the faces of people around the world now and in the future.

The Morinaga Group will, as a sustainable company that keeps growing, continue to make food that contributes to keep people's mind and body healthy toward the creation of a sustainable society, where everyone can lead happy lives. From today to tomorrow and from one generation to the next, we will continue to bring smiles to the faces of people around the world.

Our Visions (VISION)

The Morinaga Group has defined five visions to aim for. The first letter of each of these five visions spell out "G.O.A.L.S."

Good quality

By maintaining the tradition of delivering safety and satisfaction, Pursue quality with integrity and contribute to the healthy and happy lives of customers

Only-one value

Inheriting the pioneering spirit of our predecessors, who made an array of "Japan's first" achievements, Create and give new value and inspiration to society

Act globally

Based on the experience of overcoming multiple difficulties, Never bow down to adversities and expand the scope and possibilities of activities

Link together

As a company driven by the power of human resources since its founding, Build relations of trust with all stakeholders, including employees

Sustainable society

As implied by our angel logomark, for the happiness of people, Contribute to the creation of a sustainable society, thereby bringing smiles to the faces of more people.

Our Commitments (VALUE)

The Morinaga Group has been sincerely upholding these commitments for more than a century. Based on the ideal of altruism, which means to be considerate of others and think about how to contribute to them, we will continue to uphold the following five commitments: Give first priority to customers; Be a pioneer; Have an indomitable spirit; Value ties between people; and Align our business imperatives with social challenges.

With this new corporate philosophy serving as the compass guiding its corporate activities, the Morinaga Group will contribute to the realization of a sustainable society by meeting the expectations of its stakeholders and society as a whole, while endeavoring to enhance its corporate value over the long term.

We will focus on the following businesses in order to realize our 2030 Vision:
 “The Morinaga Group will Change into a Wellness Company in 2030”.

“in-” Business

The “in-” Business is focusing on “in Jelly” and “in Bar” products in its efforts to create new eating styles and propose new lifestyle options enabling people to easily boost their nutritional intake when they don’t have time for a meal, such as when playing sport or getting ready in the mornings. We aim to make the “in-” brand the No. 1 brand for food that promotes physical and mental wellness, with a focus on sports in response to growing health consciousness among consumers.

Mail Order Business

In light of heightened consumer health consciousness and expanded use of mail-order services, the mail-order business is seeking to connect directly with each customer on a personal level to help support their everyday health and well-being. The mail-order business provides products and services that help serve customers’ health and beauty needs through health foods and beverages, such as Morinaga Collagen Drink and Morinaga Aojiru.

U.S. Business

The U.S. Business’s HI-CHEW sales have continued to grow ever since the U.S. HI-CHEW launch, as customers have embraced the candy’s authentic fruitiness and a chewiness that other companies can’t replicate. We will continue with our focus on expanding and enhancing our sales networks, developing new products that provide value in the wellness field, and establishing a jelly drink market in the United States.

Frozen Desserts Business

The products of the Frozen Dessert Business are among the finest in the industry. They include highly original products that draw on our strengths in confectionery-related technical knowhow, such as Choco Monaka Jumbo, which we promote with special “freshness” marketing, and ICEBOX, which was created based on our proprietary technologies. The lineup offers a rich variety of products that are cherished by customers throughout the year regardless of the season.

Domestic Confectionery & Foodstuffs Business etc.

The Domestic Confectionery & Foodstuffs Business forms the core of our business activities. Its lineup centers on long-selling mainstay products such as HI-CHEW, DARS, Morinaga Biscuits, Milk Cocoa, and Morinaga Amazake, and we are constantly creating new delicious flavors and products suited for a variety of consumption settings. At the same time, we are pursuing the development of products with focus on health and wellness, such as high-cacao-content chocolate that tastes delicious while also delivering health benefits and amazake beverages, the nutritional and cosmetic benefits of which we are currently conducting research into. In this way, we disseminate wellness-related information and create products that are responsive to changing lifestyles.

We are always working to develop products that will please our customers more than ever before.

This challenge involves ongoing efforts to refine our core technologies to keep creating delicious flavors, and responding to changing consumer tastes through the pursuit of new manufacturing methods, textures, and mouthfeels.

in Jelly Technology

Nutrition × Tastiness × Texture × Satiety × Convenience Supporting active everyday lifestyles with the latest technology.

Choco Monaka Jumbo Technology

A trinity of crispy texture, ice cream, and chocolate. Combination of frozen desserts technology and confectionery technology.

Amazake (Sweet Rice Wine) Taste Creation/Blending Technologies

To create Morinaga's original Amazake, carefully selected Japan-produced sake wine lees and rice malt are blended in a delicate balance. The deep taste of the lees, gentle sweetness of the malt and, unique texture all combine to create the inimitable Morinaga Amazake flavor.

Chocolate flavor-making technology

MORINAGA is a Japanese chocolate pioneer. Our chocolate emphasizes the taste of cacao and delicate melt-in-the-mouth textures.

Research on Collagen Peptide

The latest research on collagen, an important component of the body, especially skin and bone.

Soft Candy Technology

Born by crossing milk caramel technology and new technology: The soft texture and juicy taste spreading throughout the world.

Research on Cocoa

The latest research on the health functionality of cocoa, expanding from the daily dinner table to the medical workplace.

Biscuit/Snack Technology

Baked to make maximum use of ingredients' delicious flavor. A broad range of taste sensations from light textures to combinations.
